

Methodology for the Development of a Measure of Worker Satisfaction

November 2018

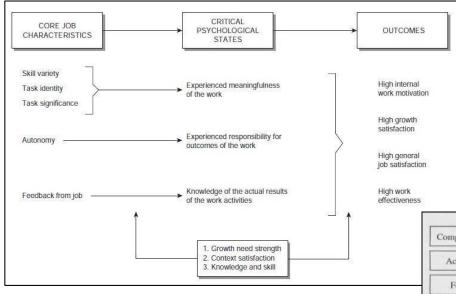

Usability and Satisfaction in A4BLUE

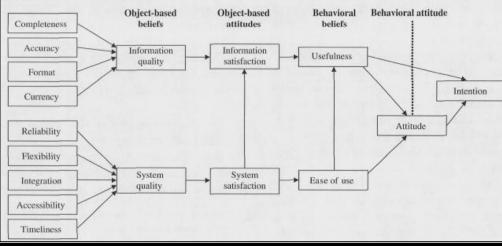

⊕ A4BLUE

Job Characteristics Model (Hackman & Oldham, 1975)

Satisfaction & Acceptance

Integration of User Satisfaction and Technology Acceptance (Wixom & Todd, 2005)

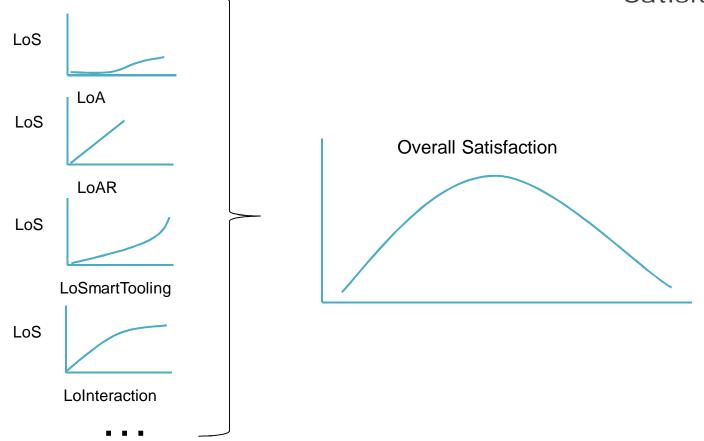

Use Case Technologies

Technology	TEK	CESA	RWTH	Airbus
Smart tool				ü
Augmented Reality (AR)	ü	ü	ü	ü
Industrial Robot	ü	ü		
Mobile Robot	ü		ü	
Personal Computer (PC)	ü			
Profiled information	ü	ü	ü	ü
Tablet/mobile device		ü		ü
Multimodal input (gesture/voice)	ü		ü	
Decision support system (including	ü	ü		ü
multichannel notifications)				
Virtual Reality (VR)		ü		

The Integration of Technology Specific Satisfaction into Overall Satisfaction

Satisfaction Measurement Options

Periodic Adaption

Develop Psychometric Satisfaction Questionnaire

Main Survey

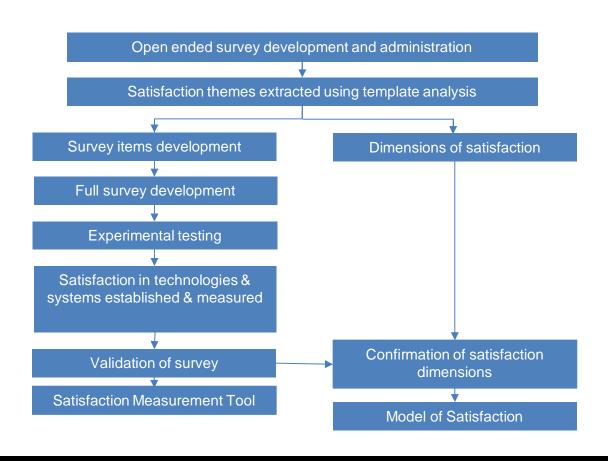

Short survey / Key items

OR Continuous Self Adapting

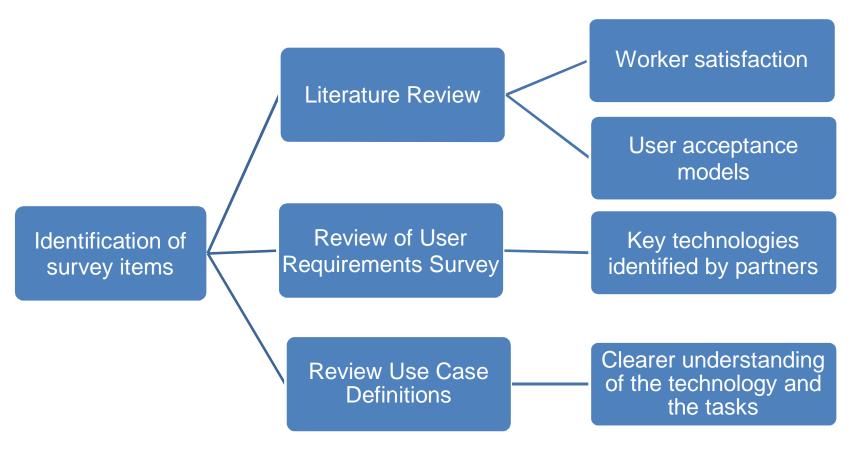

Tech Review Face Reader?

Satisfaction Model and Measurement

Survey Development

USE CASE SCENARIOS: DATA COLLECTION

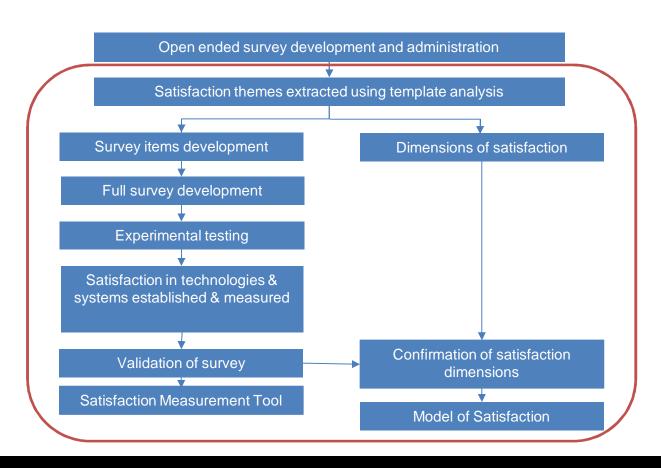

Laboratory Use Case

- TEK
 - Experimentation of As-Is Scenario
 - Open-ended survey
- RWTH
 - Experimentation of As-Is Scenario
 - Open-ended survey

Industrial Use Case

- CESA
 - Observations of As-Is Scenario
 - Observations and interviews
- AIRBUS
 - Observations of As-Is Scenario
 - Observations and interviews
 - Surveys

Next Steps

Shop Floor Application

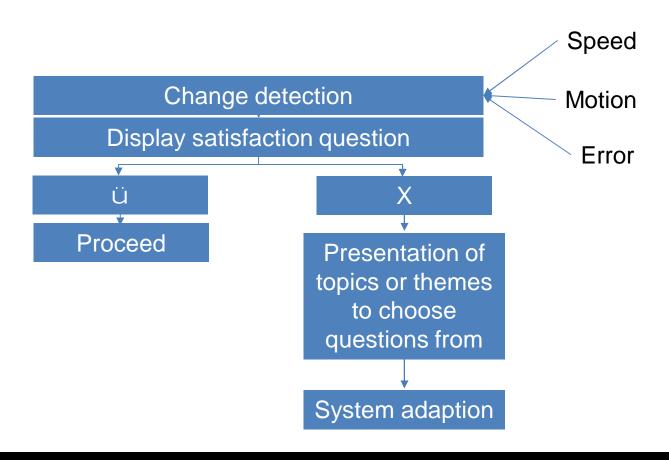

Operator completes questionnaire

- Operational individual levels
- Task

Recurrent items

- Recurrent operational levels
- Ongoing task

Triggering Criteria

Adaptive Automation in Assembly For BLUE collar workers satisfaction in Evolvable context

A4BLUE aims to:

- 1) To develop and evaluate a new generation of <u>sustainable</u>, <u>adaptive</u> workplaces dealing with evolving requirements of manufacturing processes (i.e. short & long term changes);
- 2) To introduce automation mechanisms that are suitable for flexible and efficient task execution in <u>interaction</u> with human workers and by optimising human variability through personalised and context aware assistance capabilities as well as advanced human-machine interfaces.

⊕ A4BLUE

- Adaptability: by providing an open, secure, configurable, scalable and interoperable adaptation management and assistance system (A4BLUE adaptive framework) that allows effortless integration of heterogeneous hardware and software components and is able to adjust the behaviour of workplace parts according to changes;
- 2) Interaction: by providing a set of safe, easy to use, intuitive and personalised and context aware multimodal human-automation interaction mechanisms;
- 3) Sustainability: by providing methods and tools to determine the optimal degree of automation of the new assembly processes that combine and balance social and economic criteria to maximize long term worker satisfaction and overol performance.

Specific objectives

New or enhanced automation mechanisms

Plug & Produce Capabilities

A4BLUE adaptive framework including assistance tools

Multichannel interaction mechanisms including AR

Method & Tool for the definition of the optima degree of automation

Method & Tool for assessment of worker satisfaction

Usability methodology

Assessment framework

Reference implementation FACTORY LEGACY SYSTEMS ERP, MES, CMMS .. **Worker Assistance tools Business Assistance tools VR/AR BASED TRAINING DECISION SUPPORT** COLLABORATIVE AND GUIDANCE SYSTEM (DSS) MONITORING **KNOWLEDGE PLATFORM** Off the job training: VR simulation Information aggregation Recommendations systems SENSORS Human tracking: Vision, wearable, ... Context information: maintenance guidance tasks. AUTOMATION **EVENT MANAGERS AUTOMATION** CONFIGURATION **MECHANISMS SEMANTIC VIRTUAL ASSET EVALUATION** MEDIATION MULTIMODAL INTERACTION **REPRESENTATION (models) SERVICES** Socio-economic **DATA REPOSITORY** Complex Event Processing sustainability Virtual asset representation **Production & Human** assets (factory assets Adaptation and assistance INTERACTION **DEVICES** QUANTITATIVE Smartphones & tablets Head-mounted displays Lights Speakers Monitors **MEASUREMENT OF** SATISFACTION Computer based **DEVICE MANAGERS** COLLABORATIVE **ASSET MANAGER A4BLUE ADAPTIVE Adaptation Management** Integration **FRAMEWORK PHYSICAL** LOGICAL
